GAS & DIESEL 1.5 TO 2.0 TON RANGE

The models from CLARK's 1.5 to 2 ton series are the ultimate of CLARK as a developer and manufacturer of reliable and durable forklifts. Due to their great ergonomics, performance and safety, these extremely compact trucks are also suitable for heavy duty work such as goods distribution, production and warehousing.

GAS & DIESEL 2.0 TO 3.5 TON RANGE

With the S-Series, Clark have created a truck that focuses on the needs of the operator more than ever before. The next generation of internal combustion forklifts has arrived – the new S-Series. More options than ever before can be added at the factory. Built-in speed control & weighing systems to name just two.

ELECTRIC 3 OR 4 WHEELED 1.6 TO 2.0 TON RANGE

Highly compact, easy to maneuver and extremely reliable even on wet and uneven ground, working in the smallest spaces is not a problem for the trucks of the compact 1.6 to 2 ton range. A number of options, such as different cabs or mini-levers, ensure that you will always have the right truck for your working conditions.

ELECTRIC 4 WHEELED 3 TO 5 TON

CLARK builds one of the best electric forklifts on the market with an ergonomic driving position for the operator, an easy operation concept and maximum visibility of forks and loads. Twin traction motors with parallel front drive and AC technology lead to excellent acceleration and high final travel speed. Customised options ensure adaption for each application both indoors and outdoors.

GAS & DIESEL 1.5 TO 7 TON COMPACT RANGE

Standard and compact chassis forklifts with capacities from 1.5 to 7 ton are specially designed for space-critical applications with heavy loads, where they excel with their very small turning radius and high performance.

GAS & DIESEL 6 TO 8 TON RANGE

CLARK's 4 to 8 ton range offers safe handling and high efficiency as well as low maintenance and service costs. These extremely stable CLARK trucks are designed for heavy loads and heavy-duty applications. A fully automated 2 or 3 speed transmission, wet disc brakes and a stable chassis make this series particularly efficient and durable. This lowers the downtime for maintenance and maintains truck availability.

All new equipment is sold with full manufacturers warranty
